The IRS expects that more than 70% of taxpayers will receive a refund in 2017.<sup>1</sup> What you do with a tax refund is up to you, but here are some ideas that may make your refund twice as valuable.

accounts include savings and checking accounts, as well as IRAs (except SIMPLE IRAs), Coverdell Education Savings Accounts, health savings accounts, Archer MSAs, and TreasuryDirect® online accounts. To split your refund, you'll need to fill out IRS Form 8888 when you file your federal return.

#### **Double your savings**

Perhaps you'd like to use your tax refund to start an education fund for your children or grandchildren, contribute to a retirement savings account for yourself, or save for a rainy day. A financial concept known as the Rule of 72 can give you a rough estimate of how long it might take to double what you initially save. Simply divide 72 by the annual rate you hope that your money will earn. For example, if you invest your tax refund and it earns a 6% average annual rate of return, your investment might double in approximately 12 years (72 divided by 6 equals 12).

*This hypothetical example of mathematical compounding is used for illustrative purposes only and does not represent the performance of any specific investment. Fees, expenses, and taxes are not considered and would reduce the performance shown if they were included.*

#### **Split your refund in two**

If stashing your refund away in a savings account or using it to pay bills sounds unappealing, go ahead and splurge on something for yourself. But remember, you don't necessarily have to spend it all. Instead, you could put half of it toward something practical and spend the other half on something fun.

The IRS makes splitting your refund easy. When you file your income taxes and choose direct deposit for your refund, you can decide to have it deposited among two or even three accounts, in any proportion you want. Qualified

#### **Double down on your debt**

Using your refund to pay down credit card debt or a loan with a high interest rate could enable you to pay it off early and save on interest charges. The time and money you'll save depend on your balance, the interest rate, and other factors such as your monthly payment. Here's a hypothetical example. Let's say you have a personal loan with an \$8,000 balance, a 12% fixed interest rate, and a 24-month repayment term. Your fixed monthly payment is \$380. If you were to put a \$4,000 refund toward paying down your principal balance, you would be able to pay off your loan in 12 months and save \$780 in interest charges over the remaining loan term. Check the terms of any loan you want to prepay, though, to make sure that no prepayment penalty applies.

#### **Be twice as nice to others**

Giving to charity has its own rewards, but Uncle Sam may also reward you for gifts you make now when you file your taxes next year. If you itemize, you may be able to deduct contributions made to a qualified charity. You can also help your favorite charity or nonprofit reap double rewards by finding out whether your gift qualifies for a match. With a matching gift program, individuals, corporations, foundations, and employers offer to match gifts the charitable organization receives, usually on a dollar-for-dollar basis. Terms and conditions apply, so contact the charitable organization or your employer's human resources department to find out more about available matching gift programs.

Spring Cleaning Your Finances

Converting Retirement Savings to Retirement Income

How can I prepare financially for stormy weather?

Do I need to file a gift tax return?

# Spring Cleaning Your Finances

The arrival of spring often signifies a time of renewal, a reminder to dust off the cobwebs and get rid of the dirt and grime that have built up throughout the winter season. And while most spring cleaning projects are likely focused on your home, you could take this time to evaluate and clean up your personal finances as well.

## Examine your budget..and stick with it

A budget is the centerpiece of any good personal financial plan. Start by identifying your income and expenses. Next, add them up and compare the two totals to make sure you are spending less than you earn. If you find that your expenses outweigh your income, you'll need to make some adjustments to your budget (e.g., reduce discretionary spending).

Keep in mind that in order for your budget to work, you'll need to stick with it. And while straying from your budget from time to time is to be expected, there are some ways to help make working within your budget a bit easier:

- Make budgeting a part of your daily routine
- Build occasional rewards into your budget
- Evaluate your budget regularly and make changes if necessary
- Use budgeting software/smartphone applications

## Evaluate your financial goals

Spring is also a good time to evaluate your financial goals. Take a look at the financial goals you've previously set for yourself — both short and long term. Perhaps you wanted to increase your cash reserve or invest more money toward your retirement. Did you accomplish any of your goals? If so, do you have any new goals you now want to pursue? Finally, have your personal or financial circumstances changed recently (e.g., marriage, a child, a job promotion)? If so, would any of these events warrant a reprioritization of some of your existing financial goals?

## Review your investments

Now may be a good time to review your investment portfolio to ensure that it is still on target to help you achieve your financial goals. To determine whether your investments are still suitable, you might ask yourself the following questions:

- Has my investment time horizon recently changed?
- Has my tolerance for risk changed?
- Do I have an increased need for liquidity in my investments?

- Does any investment now represent too large (or too small) a part of my portfolio?

*All investing involves risk, including the possible loss of principal, and there can be no assurance that any investment strategy will be successful.*

## Try to pay off any accumulated debt

When it comes to personal finances, reducing debt should always be a priority. Whether you have debt from student loans, a mortgage, or credit cards, have a plan in place to pay down your debt load as quickly as possible. The following tips could help you manage your debt:

- Keep track of your credit card balances and be aware of interest rates and hidden fees
- Manage your payments so that you avoid late fees
- Optimize your repayments by paying off high-interest debt first
- Avoid charging more than you can pay off at the end of each billing cycle

## Take a look at your credit history

Having good credit is an important part of any sound financial plan, and now is a good time to check your credit history. Review your credit report and check for any inaccuracies. You'll also want to find out whether you need to take steps to improve your credit history. To establish a good track record with creditors, make sure that you always make your monthly bill payments on time. In addition, you should try to avoid having too many credit inquiries on your report (these are made every time you apply for new credit). You're entitled to a free copy of your credit report once a year from each of the three major credit reporting agencies. Visit [annualcreditreport.com](http://annualcreditreport.com) for more information.

## Assess tax planning opportunities

The return of the spring season also means that we are approaching the end of tax season. Now is also a good time to assess any tax planning opportunities for the coming year. You can use last year's tax return as a basis, then make any anticipated adjustments to your income and deductions for the coming year.

Be sure to check your withholding — especially if you owed taxes when you filed your most recent tax return or you were due a large refund. If necessary, adjust the amount of federal or state income tax withheld from your paycheck by filing a new Form W-4 with your employer.

## Converting Retirement Savings to Retirement Income

**Regardless of which path you choose with your retirement accounts, keep in mind that generally, you'll be required to begin taking minimum distributions from employer-sponsored plans and traditional IRAs in the year you reach age 70½; you can delay your first distribution as late as April 1 of the following year.**

**Taxable distributions from traditional employer-sponsored plans and IRAs prior to age 59½ may be subject to a 10% penalty tax, unless an exception applies.**

**Different rules apply to Roth accounts. For information on how Roth accounts may fit into your retirement income picture, talk to a financial professional.**

You've been saving diligently for years, and now it's time to think about how to convert the money in your traditional 401(k)s (or similar workplace savings plans) into retirement income. But hold on, not so fast. You may need to take a few steps first.

### Evaluate your needs

If you haven't done so, estimate how much income you'll need to meet your desired lifestyle in retirement. Conventional wisdom says to plan on needing 70% to 100% of your annual pre-retirement income to meet your needs in retirement; however, your specific amount will depend on your unique circumstances. First identify your non-negotiable fixed needs — such as housing, food, and medical care — to get clarity on how much it will cost to make basic ends meet. Then identify your variable wants — including travel, leisure, and entertainment. Segregating your expenses into needs and wants will help you develop an income strategy to fund both.

### Assess all sources of predictable income

Next, determine how much you might expect from sources of predictable income, such as Social Security and traditional pension plans.

**Social Security:** At your full retirement age (which varies from 66 to 67, depending on your year of birth), you'll be entitled to receive your full benefit. Although you can begin receiving reduced benefits as early as age 62, the longer you wait to begin (up to age 70), the more you'll receive each month. You can estimate your retirement benefit by using the calculators on the SSA website, [ssa.gov](https://ssa.gov). You can also sign up for a *my* Social Security account to view your Social Security Statement online.

**Traditional pensions:** If you stand to receive a traditional pension from your current or a previous employer, be sure to familiarize yourself with its features. For example, will your benefit remain steady throughout retirement or increase with inflation? Your pension will most likely be offered as either a single life or joint-and-survivor annuity. A single-life annuity provides benefits until the worker's death, while a joint-and-survivor annuity generally provides reduced benefits until the survivor's death.<sup>1</sup>

If it looks as though your Social Security and pension income will be enough to cover your fixed needs, you may be well positioned to use your other assets to fund those extra wants. On the other hand, if your predictable sources are not sufficient to cover your fixed needs, you'll need to think carefully about how to tap your

retirement savings plan assets, as they will be a necessary component of your income.

### Understand your savings plan options

A key in determining how to tap your retirement plan assets is to understand the options available to you. According to the Government Accountability Office (GAO), only about one-third of 401(k) plans offer withdrawal options, such as installment payments, systematic withdrawals, and managed payout funds.<sup>2</sup> And only about a quarter offer annuities, which are insurance contracts that provide guaranteed income for a stated amount of time (typically over a set number of years or for the life expectancy of the participant or the participant and spouse).<sup>3</sup>

Plans may allow you to leave the money alone or require you to take a lump-sum distribution. You may also choose to roll over the assets to an IRA, which might offer a variety of income and investment opportunities, including the purchase of annuity contracts. If you choose to work part-time in retirement, you may be allowed to roll your assets into the new employer's plan.

Determining the right way to tap your assets can be challenging and should take into account a number of factors. These include your tax situation, whether you have other assets you'll use for income, and your desire to leave assets to heirs. A financial professional can help you understand your options.

<sup>1</sup>Current law requires married couples to choose a joint-and-survivor annuity unless the spouse waives those rights.

<sup>2</sup>"401(k) Plans: DOL Could Take Steps to Improve Retirement Income Options for Plan Participants," GAO Report to Congressional Requesters, August 2016

<sup>3</sup>Generally, annuity contracts have fees and expenses, limitations, exclusions, holding periods, termination provisions, and terms for keeping the annuity in force. Most annuities have surrender charges that are assessed if the contract owner surrenders the annuity. Qualified annuities are typically purchased with pre-tax money, so withdrawals are fully taxable as ordinary income, and withdrawals prior to age 59½ may be subject to a 10% penalty tax. Any guarantees are contingent on the claims-paying ability and financial strength of the issuing insurance company. It is important to understand that purchasing an annuity in an IRA or an employer-sponsored retirement plan provides no additional tax benefits other than those available through the tax-deferred retirement plan.

## How can I prepare financially for stormy weather?

Floods, tornadoes, torrential rain, lightning, and hail are common events in many parts of the country during the spring and may result in widespread damage. Severe weather often strikes with little warning, so take measures now to protect yourself and your property.

**Review your insurance coverage.** Make sure your homeowners and auto insurance coverage is sufficient. While standard homeowners insurance covers losses from fire, lightning, and hail, you may need to buy separate coverage for hurricanes, floods, earthquakes, and other disasters. Consult your insurer or insurance professional, who can help determine whether you have adequate coverage for the risks you face.

**Create a financial emergency kit.** Collect financial records and documents that may help you recover more quickly after a disaster. This kit might contain a list of key contacts and copies of important documents, including identification cards, birth and marriage certificates, insurance policies, home inventories, wills, trusts, and deeds. Make sure your kit is stored in a secure fireproof and

waterproof container that is accessible and easy to carry. The Emergency Financial First Aid Kit, available online at [ready.gov](http://ready.gov), offers a number of checklists and forms that may help you prepare your own kit, as well as tips to guide you through the process.

**Protect your assets.** Take some commonsense precautions to safeguard your home, vehicles, and other possessions against damage. For example, to prepare for a possible power outage, you might want to install an emergency generator and a sump pump with a battery backup if you have a basement or garage that is prone to flooding. Inspect your yard and make sure you have somewhere to store loose objects (e.g., grills and patio furniture) in a hurry, cut down overhanging tree limbs, and clean your gutters and down spouts. Check your home's exterior, too, to make sure that your roof and siding are in good condition, and invest in storm windows, doors, and shutters. In addition, make sure you know how to turn off your gas, electricity, and water should an emergency arise. And if you have a garage, make sure your vehicles are parked inside when a storm is imminent.

## Do I need to file a gift tax return?

If you transfer money or property to anyone in any year without receiving something of at least equal value in return, you may need to file a federal

gift tax return (Form 709) by the April tax filing deadline. If you live in one of the few states that also impose a gift tax, you may need to file a separate gift tax return with your state as well.

Not all gifts, however, are treated the same. Some gifts aren't taxable and generally don't require a gift tax return. These exceptions include:

- Gifts to your spouse that qualify for the marital deduction
- Gifts to charities that qualify for the charitable deduction (Filing is not required as long as you transfer your entire interest in the property to qualifying charities. However, if you are required to file a return to report gifts to noncharitable beneficiaries, all charitable gifts must be reported as well.)
- Qualified amounts paid on someone else's behalf directly to an educational institution for tuition or to a provider for medical care

- Annual exclusion gifts totaling \$14,000 or less for the year to any one individual (However, you must file a return to split gifts with your spouse if you want all gifts made by either spouse during the year treated as made one-half by each spouse — enabling you and your spouse to effectively use each other's annual exclusion.)

If your gift isn't exempt from taxation, you'll need to file a gift tax return. But that doesn't mean you have to pay gift tax. Generally, each taxpayer is allowed to make taxable gifts totaling \$5,490,000 (in 2017, up from \$5,450,000 in 2016) over his or her lifetime before paying any gift tax. Filing the gift tax return helps the IRS keep a running tab on the taxable gifts you have made and the amount of the lifetime exclusion you have used.

If you made a gift of property that's hard to value (e.g., real estate), you may want to report the gift, even if you're not required to do so, in order to establish the gift's taxable value. If you do, the IRS generally has only three years to challenge the gift's value. If you don't report the gift, the IRS can dispute the value of your gift at any time in the future.
